FISHTALK CONTROL

Fishtalk Control gives you a complete overview of the production from Broodstock to Harvest Heading.

Plan and finance, biology plan, finance – budgeting, economy control, production cost etc. Fishtalk Control captures data from broodstock to harvest and has powerful reporting and analysis capabilities.

Six reasons to use Fishtalk Control software for aquaculture:

- Track the fish from roe to harvest
- Flexible growth calculations
- Report, analyze, compare or get status on device, group and generation
- The same database for hatcheries and adult fish
- Can be used by both smaller and larger companies
- Flexible user management provides different user rights and user roles

Fishtalk Control is seamlessly integrated with Fishtalk Plan and Fishtalk Finance.

FISHTALK CONTROL APP

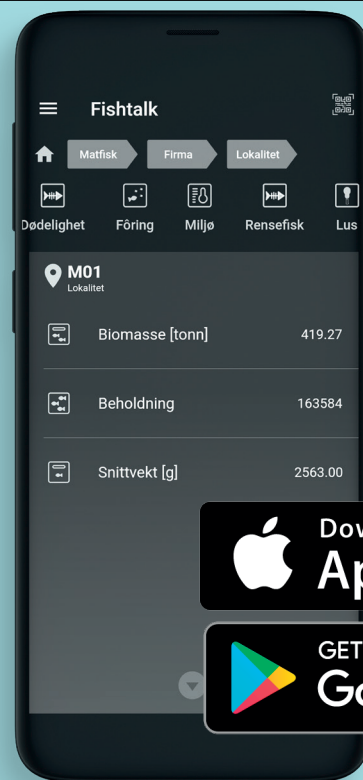

Fishtalk Control App for smart phone and tablet has been released in a new version. The app is designed to be easy to use with a flat structure and with core features easily available.

Fishtalk Control App facilitates for daily registrations of:

- Feeding
- Environment
- Mortality
- Mortality cleaner fish
- Lice count

”The app is easy to use, and it is of great value to have Fishtalk information readily available. It is very useful to be able to make daily registrations in such a user-friendly way”

Rune Jørgensen, Flakstadvåg Laks AS

Some highlights:

- Registrations are sent directly to the Fishtalk database
- Easy navigation via tree structure or by scannable QR codes from Fishtalk
- New lice counting parameters added
